- 14.5.2 Compare the amount of money available for investment with the value of the bet as in 14.5.1 above. - 14.5.5 Print a bet ticket and in addition to the bet details normally printed, show the percentage of the total bet purchased if less than 100%. - 14.6** **Dividends:** All unit bet dividends shall be calculated to the completed rupee:
- 14.7** Fractional bet dividends shall be calculated by multiplying the unit bet dividend by the percentage of the unit bet purchased and rounded down to the nearest rupee. This resultant dividend is then multiplied by the number of times that the bet is won and rounded down to the nearest rupee.

- 14.8** The dividend shall be determined by dividing the net pool by the total number of unit and fractional unit bets on the winning combination(s).
- 14.9** In the event that there are no full unit winning bets on a Totalisator pool, and at the same time, the sum of the percentage of bets purchased of all fractional winners is less than 100% of the unit of betting, then the dividend will be determined for a full unit of betting and the balance of the dividend, i.e. not apportioned to the fractional winners, will be carried forward as per the Rule governing the carry forward on each Totalisator pool.
